

Gayle Scott, Consultant, Authentic Business Group CIC

There is only one thing more remarkable than seeing an individual fully discover and celebrate who they are and that is seeing a team of confident unique individuals come together as one fully embracing each other within the organisation they find themselves. I love a good story especially a transformation one and I always feel deeply privileged to play a part as a consultant in the story of others.

I facilitate with a sensitivity to what emerges into the space, believing the way forward is not pre-set but will be discovered in and through deep listening and ongoing collaborative processes.

Clients value my enthusiasm, observations and genuine belief in their unfolding journey.
