

i-Engage Workshop Testimonial

Cindy Chong, CEO & Co-Founder | Dbix Group of Companies

"Our entire staff team which comprises Management, Operations & Administration, Project management, Sales & Marketing and Technical support, embarked on a two-day i-Engage Workshop with Authentic Business Solutions. After going through the workshop, many of our staff said they now understand their team members much better and this has strengthened their relationships. Understanding each other's natural tendencies and strengths also helps the team to work more effectively as well.

We are very happy that the team, together with management, was able to develop a set of company core values during the workshop, which reflects the strengths of the entire team. This is very important for our company, as we want our team to own the company's core values so that they can live up to the values and at the same time align themselves with the company's direction. We highly recommend this workshop to any company who wants to help their team to increase their effectiveness and engagement within their company."
